Figure 1j. 5-year age-standardized relative survival (ASRS%; 0–74 years) by country and cancer of the liver (median (minimum-maximum) of values if more than one registry are contributing)

- China: Median 5-year ASR% (0-74 years) value: 05-25
- Republic of Korea: Median 5-year ASR% (0-74 years) value: 10-20
- Singapore: Median 5-year ASR% (0-74 years) value: 02-11
- Zimbabwe: Median 5-year ASR% (0-74 years) value: 00-04
- Thailand: Median 5-year ASR% (0-74 years) value: 00-04
- The Gambia: Median 5-year ASR% (0-74 years) value: 00-04
- India: Median 5-year ASR% (0-74 years) value: 00-04
- Uganda: Median 5-year ASR% (0-74 years) value: 00-04
